Key-Box Key Management Systems are the affordable intelligent choice!

Key-Box Automated Key Management Systems

Secure-Lock
Exclusive 100% solid metal
intelligent key fobs

Choosing the right key system for your key management requirement is an important task to ensuring that you are choosing a key system that will secure your valuable keys 24/7 Key-Box is an easy intelligent choice as it's the only key system in the market place that offers its exclusive Secure-Lock high security 100% solid metal intelligent locking key fobs. Each key fob is individually locked in place inside the cabinet to ensure keys are not removed by authorized users

Key-Box

Intelligent solutions for securing your valuable vehicle keys

A brief description on how the Key-Box Secure-Fob intelligent key fob works

The way the **Key-Box** automated key systems work with the individual **High Security "Secure-Lock" Locking Key Fobs**. Each individual user is issued a pre-selected PIN which is entered on the cabinet keypad. Once the PIN is entered and authorized by the system the door automatically opens and the user will have access to only those keys authorized to them. The remainder of the keys stay securely locked in the cabinet. After a key is removed, the system records when it was taken, when it was returned and the user's information etc. If a curfew or time limit is set in the system, and a key is not returned on time, the system will automatically generate an email to management notifying them of the past due key/keys and user name etc. The system therefore gives you a complete audit trail 24/7 of the usage on your valuable facilities, assets and vehicle keys while encouraging user accountability.

Our Secure-Lock 100% solid metal intelligent key fobs is the intelligent choice for securing keys/assets

Choosing the size of the key slot capacity in your Key-Box cabinet is an easy task Simply choose the number of key strips you require in the cabinet each key strip contains 14 key slots. Each 9700 SC cabinet can hold up to 66 key strips.

The Key-Box 9700 SC series key systems are very easy to set up by your in house IT personnel we will provide unlimited free technical support to your staff if required while setting up the systems. In 95% of our installations our clients across North America have set up their own systems without any difficulty. The systems come complete with software, set up instructions and a 3 year limited warranty.

Key-Box Key Management Systems

Technical Specifications

9700 SC Series

Modular Design Features

Designed to accommodate **between 14 and 924 keys (or key sets)**, the innovative **9700 SC Series** design allows for starting small and later expanding by adding multiples of 14 key positions (called expansion key strips) as required.

Expansion Locking Key Strips provide a solution for organizations requiring less security but still an audit of key usage. **LED lighting** indicate which keys can be taken, which keys are restricted and assist the user when returning the key to the correct location

14 key slot expansion key strip with LED indicating lighting

The cabinets are supplied with 3 sliding drawers. The control panel consists of the user interface which includes the screen, keypad and access card reader.

PC Software Administration

The 9700 SC Series is administered from the user friendly **KeyWin 5 Pro software** supporting a **Microsoft Access** or **SQL database**.

The 9700 SC Series can communicate with the KeyWin 5-Pro software using a range of different options including **Ethernet**, **GPRS**, **RS485**, **RS232** and **modem**.

Multiple systems can be networked together over a local or wide area network to provide accountability for a limitless number of keys administrated from multiple PC workstations running the KeyWin 5-Pro software. KeyWin can manage multiple 9700 SC cabinets.

User Identification

The 9700 SC Series can support any type of access control device required to identify a user to the key system. Supported devices include **RFID proximity readers** from all leading access control manufacturers, **magstripe**, **barcode** and **bio-metric technologies** such as **fingerprint**, etc.
