- Secure key wall boards with secured individual locking key holders

Reusable key holder with tamper Proof key ring

Secure Key Management Solutions for all Businesses / Organizations

Our **Secure-Lock** alternative key management systems provides user friendly key control solutions for all sorts of facilities/businesses that require an organized key solution. The keys to your facilities and business are one of its most important assets. Without access to your keys you cant control your business and facility keys and other assets. The secured key system provides the perfect solution by giving you the highest level of control and security for your valuable facility keys.

With our **Secure-Lock** key system, management and staff will always know who has removed the facility keys and who the users are that have the key/keys etc. Thus saving a lot of time if another user requires a certain facility key or keys that are not in the cabinet or wall board key system.

The way our **Secure-Lock** key systems work is an authorized user with their assigned access ID key enters their **ID** key into the key lock holder with the facility key/keys they require once the user ID key is entered into the key lock holder the facility keys are released. When the user returns the keys they would insert the key holder with the at-tached keys back to the key lock holder, the key lock holder would than release the users ID key.

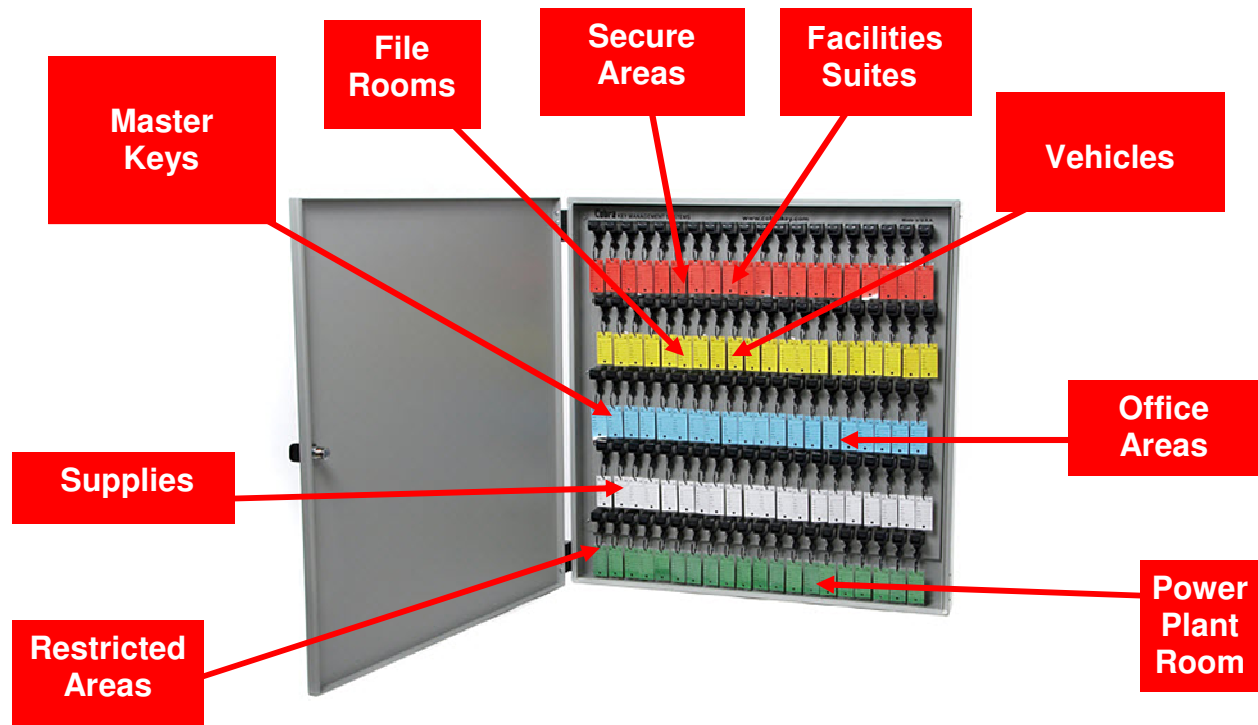

New Optional PIN access
